PITTSBURGH, PENNA.

30th Anniversary Dollar Sale — The Greatest In Our History.

Thirty years ago this Spring, I opened my first furniture store in Pittsburgh. It was a little store, but I handled honest merchandise, honestly priced for honest people, and my business grew gradually, year by year, until my stores in Pittsburgh and New York now rank with the best in the world, and my mail order business has grown into a mammoth institution, performing a nation-wide service.

To celebrate our 30th Anniversary, we are now opening the greatest sale in our history. There are three big reasons why this sale is of importance to you.

Months ago I foresaw that the prices on all kinds of raw materials were going to advance, and I knew that this would mean higher prices in furniture, carpets, stoves, and in fact everything that I sell. Anticipating these advances, I had my buyers plan this sale months ahead of time. They placed orders at that time for all of the desirable and attractive goods shown in this booklet. Scarcely any of these goods could be duplicated today at the prices we paid for them.

FIRST REASON: Therefore, the first reason that this sale should interest you, is because you are getting the finest selection of merchandise at prices that will mean a saving of from 20 to 40%. Later on my prices too, will be higher, and I therefore, urge you to buy now, to take advantage of this great saving.

SECOND REASON: The second reason that this sale should interest you, is that:

FROM THE TIME YOU RECEIVE THIS BOOKLET, AND UP TO APRIL 15, 1923, YOU CAN BUY \$50.00 WORTH, OR LESS, FROM THIS BOOKLET, OR MY NEW LARGE CATALOG AND SEND ONLY \$1.00 FIRST PAYMENT WITH YOUR ORDER.

Use the goods 30 days and if they please you, begin paying for them according to my regular schedule of terms—a little each month until the full amount of the order is paid. Or if your order exceeds \$50.00, refer to Page 2 to determine the amount of the reduced first payment, required during this special sale.

If you do not find what you want in this Sale Booklet, send for my new Spring and Summer, 30th Anniversary Catalog, which is just off the press. It is marked No. P. 106 on the index page. Do not order from any of my old catalogs because orders are now being accepted only from this booklet or my new No. P. 106 catalog, which contains hundreds of bargains in new and up-to-date furnishings for the home.

THIRD REASON: The third reason to interest you in this Dollar Sale, is that you take absolutely no risk when you order from Spear. Use the goods thirty days and if you are at all disappointed, or displeased, I will permit you to return your purchase and will refund your first payment, and all transportation charges. The trial will not cost you one penny.

I repeat to you, the three reasons why you should take advantage of this Dollar Sale:—First, you can select from the choicest merchandise at the lowest prices.—Second, you are buying on terms so small that you will not miss the money.—Third, you are ordering goods with an absolute guarantee of your money back after 30 days' trial if for any reason you are displeased with your purchase. Be quick to take advantage of this unusual opportunity. All orders received by April 15th will be subject to these special conditions and terms. Be one of the first to order so that we can give you our best service.

Sincerely yours, *Nathaniel Spear*
President.

Massive Seven-Piece Living Room Suite

A Whole Roomful of Furniture at an Extremely Low Price. Back and Seats Richly Upholstered in Spanish Artificial Leather. Made of Solid Oak Throughout. Finished Beautiful Glossed Golden or Nut Brown Fumed Oak

\$34⁹⁵

For Complete Suite of 7 Pieces

Special Dollar Sale Terms: \$1.00 Cash With Order, Balance \$3 Monthly

A Whole Roomful of choice, cheerful living room furniture at the remarkably low price of \$34.95—a suite that would ordinarily sell for over \$50. Who ever heard of such a remarkable value? By placing a large order before the recent advance in lumber and other materials, we made a big saving which in turn we pass to our customers. You can buy it on the very low terms of \$1.00 cash and \$3.00 per month, payments so small you won't miss them—less than 10c a day. Don't fail to refurbish your living room now—take advantage of this wonderful opportunity. Prices are advancing daily and later on this same suite will cost considerably more money.

Rich in Appearance What a wonderful difference this suite will make in the appearance of your home! It is a very artistic design, and all pieces are massive in construction, the finish is excellent and the rich upholstered backs and seats in brown Spanish artificial leather are very attractive. This is the kind of furniture you have always wanted and it will give lifetime service.

Made of solid oak, thoroughly kiln-dried and air-seasoned—finished in your choice of highly glossed golden or brown fumed. Oak is very hard, close grained and will not swell or warp. It is the kind of material that will stand every day use and extra hard service for a lifetime. This suite is top notch in every single respect you can think of, except the price.

The Complete Suite consists of large arm rocker, arm chair, sewing rocker, side chair, library table, tabouret and book ends. The library table is 30 inches high, 34 inches long and 24 inches wide. The large square legs with the wide end panels make a splendid appearance. The seat at the bottom gives you ample space for books, papers, etc.

The Rocker and arm chair are 36 inches high and have seats 19x19 in. They are built for comfort and appearance. The seats and backs of shape retaining, non-sag construction are well padded and covered in the best grade of Brown Spanish Artificial Leather. The wide arms and large front posts give them a massive appearance which is set off by the gracefully shaped top and front rails.

The Sewing Rocker and side chair are 34 inches high and have 16x16 inches seats. The backs and seats, like the chair and rocker, are filled with an abundance of sanitary upholstering materials and will retain their shape permanently. They are both substantial, comfortable pieces and fit in well with the balance of the suite.

The Tabouret has a 12x12-inch top and is 14 inches high. It is rigidly braced by a pair of cross braces and makes an ideal stand for flowers, plants, etc. A tabouret of this type improves materially the appearance of any room. The book ends are large and heavy enough to support a number of books.

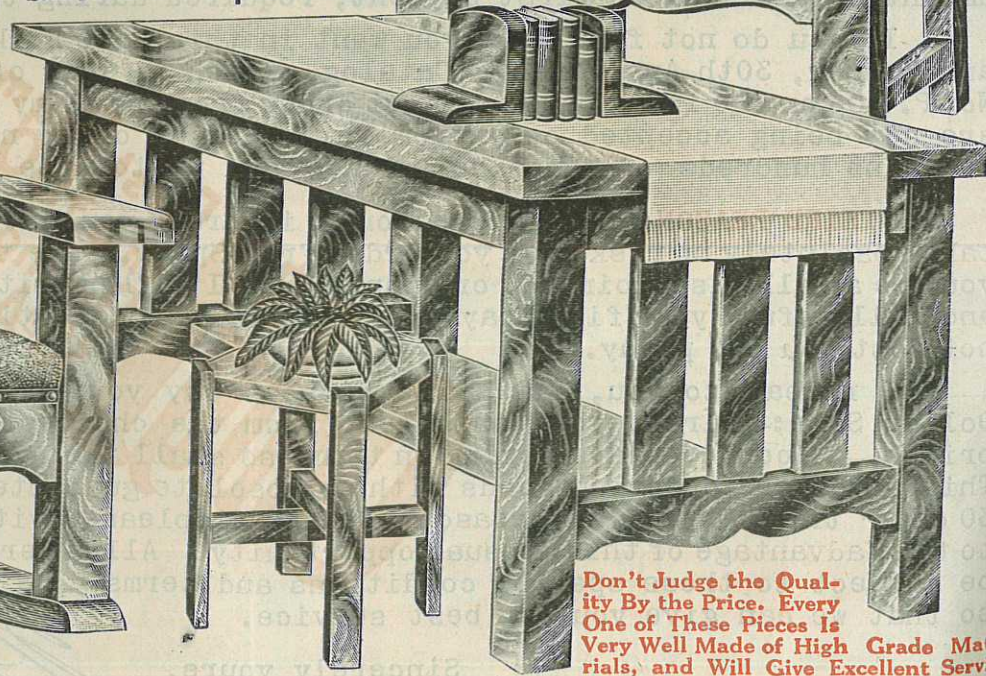

Without A Doubt this suite represents one of the biggest bargains we have ever offered, and our interest does not end when we receive your order. You must be satisfied.

We will give you 30 days to decide, and if at the end of that time you are not thoroughly pleased, we will take the suite back and refund your money, including all freight charges you have paid. Shipped from our factory in New York State, safe delivery guaranteed. Shipping weight of complete suite, 210 lbs.

has been paid to the construction of this carriage. It is easy to push, easily handled and being constructed of the better grade of the finest woven fibre. The fibre of which this carriage is made is perfectly smooth in texture and takes a kid-glove-like finish. The finish of this carriage is applied by our new patented, greatly improved, air-dry process, which gives the carriage a beautiful finish. It has the beautiful finish that every proud mother desires on the vehicle in which her little one is to ride. The frame is reinforced with steel angle braces to insure permanency and wearing quality.

The Reversible Gear

adds greatly to the attractiveness of this carriage. It enables you to turn the body of the carriage completely around so that the baby is facing you when you are wheeling it. (The small illustration below at the right hand side shows carriage with body reversed.) The body is firmly locked in either position, yet the change can be made instantly, the lock operating by foot pressure.

The Finish

This carriage is supplied regularly in a beautiful gray enamel, cream or deep royal blue fancy finish. The royal blue is by far the most popular on the market today and we recommend it very highly. These three finishes are carried in stock at our Pittsburgh warehouse. We also can supply the handsome maroon finish, a rich dark red of the most handsome shade, which is shipped direct from our factory in Southern Pennsylvania and requires about 10 days to 2 weeks to ship. All finishes extra well crated and guaranteed to reach you in perfect condition. As a further evidence of the desirability of this carriage we call your attention to the fact that it only weighs 48 pounds uncrated, shipping weight crated about 60 pounds. Order on 30 days' trial and be convinced of its many sterling qualities.

The Springs

Note the great length of the springs and of their graceful, sweeping curve, which insures the greatest amount of comfort for the baby and also makes it much easier to handle this carriage. The handle is ebony finish and attached to the pushers by nickel-plated hand corners. This carriage is also equipped with an improved brake which operates directly on the tires. Another improvement is the new type axle which reduce the weight of the carriage materially and make the four wheels run true at all times. Wheels measure 14 inches in diameter and the solid rubber tires are 5/8 inches in diameter. The pushers are 3/4-inch full tubular construction, extending clear to the front axle with beautiful nickel trimmings. The long sweep of this pusher gives rigidity and strength.

This Stroller is much lighter than any baby carriage, is convenient for mother and child and contains many features usually embodied only in expensive carriages. When out for baby's airing, baby sits up as shown in the illustration, but if baby tires and wishes to enjoy a little nap, the back of the stroller may be reclined to the footwell as shown in the small illustration below. In that way baby can stretch out at full length in perfect comfort. This stroller has a bed length of 33 inches, unusually large size.

Utmost Comfort The springs insure easy riding for the tiny baby or the older child. They have a long sweep, are made of resilient, flexible steel, and cushion the shocks which would otherwise tire baby out. Combines light weight with strength and is easy to run.

The Body and Hood are made of the finest machine woven fibre, with a velvety smoothness, in a beautiful basket woven design with fancy woven edges. The back is fully adjustable, and the stroller is well padded and upholstered in durable Bedford cord in colors to match the various finishes. The hood is fully adjustable, may be tipped forward or backward to protect the child from the direct sun, and is equipped with glass windows set in nickel plated frames.

The Wheels are strongly constructed of heavy steel wire, ornamented with nickel plated hub caps and equipped with resilient 1/2-inch rubber tires. Front wheels are 8 inches in diameter and rear wheels 12 inches. Stroller has a safety strap and a positive action brake. Seat measures 11x12 inches and the body over all measures 20x33 inches; even a large youngster can stretch out at full length in utmost comfort.

The Finish You have your choice of four finishes: Gray Enamel, Cream, Royal Blue or Maroon. We especially recommend the Royal Blue and Maroon fancy finishes, which are as attractive as any colors we have ever seen. The maroon finish requires about 2 weeks to ship; the other finishes can be shipped upon receipt of order. The pushers are full tubular type, the strongest construction known and extend clear to the foot axle. This stroller is a wonderful value at this price. A storm curtain is included free of charge.

Roomy Loom Woven Collapsible Sulky. Your Choice of Gray or Cream Finishes with Fabrikoid Hood to Match. Light—Comfortable—and Well Made

The Choice Of A Baby Vehicle is frequently rather confusing. A mother naturally wants to afford her infant the greatest possible comfort and at the same time consider her own health and strength. For every day use when the mother takes the baby out for its daily airing this sulky is the ideal thing to use.

The Construction. The sulky is 16 inches wide, and the body from the foot well clear to the back with the back rest reclined measures 26 inches long. It folds in one motion into a compact car or other conveyance. It opens and closes easily without effort and fits into so compact a space that it is very easily handled. It is made with a durable woven reed fibre body, finished in either a Gray or Cream enamel; waterproof fabrikoid hood in colors to match, and frame of steel, black enameled. Be sure when ordering to specify the finish desired.

The Seat is made of three-ply venice and it is upholstered with fabrikoid (artificial leather). This sulky is exceedingly well made with comfortable full-length springs. The back is adjustable and the hood is of three-bow type fully adjustable and covered with fabrikoid to match the body of the vehicle. It is strictly waterproof and exceedingly durable. The handle is of the long fold back type. The wheels are 10 inches in diameter and fitted with one-half inch resilient rubber tires. Splendid Values in Low Priced Carriages

\$23⁸⁵

Made of Woven Fibre in Gray Enamel, Handsome Cream or Coffee Brown Finish. Has an Adjustable Back and Hood and Reversible Gear. Positively the Best Value Ever Offered in a Carriage at This Price

In This our lowest priced carriage we offer positively the best value ever sold for \$23.85. In most carriages at this price the pushers are of the type which are attached direct to the body and are much inferior and weaker than the full tubular pushers which in this pattern extend clear to the front of the gear and are fastened to the front axle. In addition, this carriage is made with reversible gear which permits the body to be turned completely around so the baby is facing you and is in full view.

The Same Care is exercised in the manufacture of this carriage as in our higher priced models but of course it is not as closely woven on hood and body, nor is it as roomy, comfortable and easy riding as our higher priced models, which also have storm curtain and larger wheels. We recommend our better carriages, but this one is indeed a real value. To fully realize what a bargain it represents compare it with similar carriages sold elsewhere at \$32.50 to \$40.00. We have crowded into it all the value possible at this price, we have cut our profit down to the bone and we will permit you to use it 30 days at our risk.

The Body and Hood are made of selected machine woven reed fibre on a steel angle braced frame. It is a light easy running carriage and the woven sides, back and hood are upholstered in Bedford cord. Back and hood are both adjustable to any position. Gear is reversible with flat comfortable spring construction. Made to give long and satisfactory service. The wire wheels are 12 in. in diameter with 1/2-inch rubber tires and nickel plated hub caps. Body measures 35 in. long with back rest extended, and is 18 in. wide. Furnished in your choice of gray enamel, cream, or coffee brown finish. Be sure to state choice.

A Refrigerator With a Water Cooler

is a very desirable article about the house, especially during the hot summer months. How often have you wished for a drink of nice cool water on a hot day and did not care to go to the trouble of cracking ice, etc.? In this refrigerator, the ice keeps the water uniformly cold at all times—you merely open the spigot and you have a cold, refreshing drink immediately. It is equipped with a separate porcelain lined water tank, nickel faucet and tumbler holder. The method of construction of this refrigerator is the very best that can be produced at the price. It is made of thoroughly weathered and kiln-dried selected hard wood, and is finished a lustrous English Oak. It harmonizes with the latest styles in up-to-date furniture.

The Insulation is of pure clean odorless mineral wool. Mineral wool is a fibrous, soft, pliable, elastic mass. The tissues cross and interlace in every direction, and the contained air is held "still." That is why it is such a good non-conductor, and is one of the greatest features in refrigeration. The front apron at the bottom may be raised or lowered and a large drip pan can be used.

The Hardware and Trim-mings

are of solid bronze, silver nickel-plated finish, giving the refrigerator a pleasing appearance. The shelves are heavy silver-tinned wire mesh, so circulation of air is in no way hindered at any time.

This Refrigerator

has our new style provision chamber floor, so constructed that there is no wooden sill for absorption and no joints to collect moisture or to secrete drippings of food or fluids, and is absolutely sanitary. The interior is white enamel, baked on, and will not peel or crack. The glass trap is another advantage, for the reason that it will never rust and prevents outside air and odors from getting into the refrigerator. Dirt and filth will not cling to it, and it can be easily removed and cleaned as soon as sediment collects. It is far superior to, and can be kept much sweeter and purer than a metal trap.

The Ice Chamber

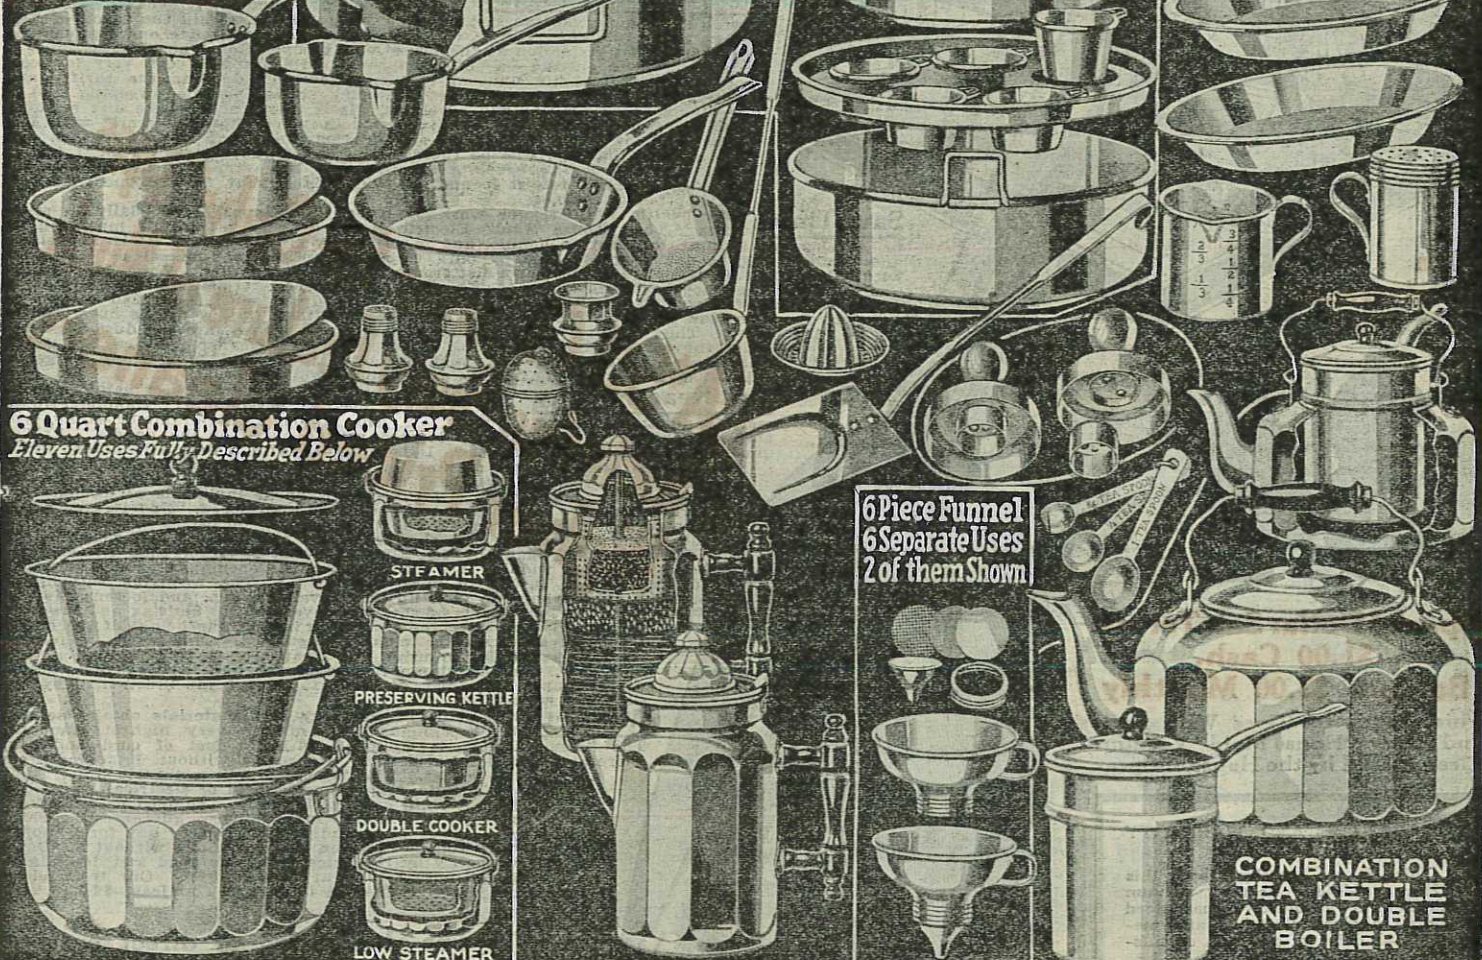

is constructed entirely of metal, with solid ice pan corners, and can always be kept sweet and pure; it is far superior to ice chambers with wood corners, which give off disagreeable odors after they are saturated with water. The casters are strong and self-retaining, and the ice chamber is lined with galvanized steel, with ice pan of one sheet of solid metal. This process is covered by our solid ice pan corner patent.

Ice Saving Construction

This refrigerator contains seven insulating walls: the outer case, a waterproof sheathing, a thick layer of mineral wool, another waterproof sheathing, air space, inside case of matched wood, and white enamel galvanized steel lining. From this you will note that our "ICELAND" refrigerators are better insulated than others, and consequently better preservers of ice and food. The illustration here shows our No. PF3133X.

The "House Maid" Electric includes every feature of much higher priced cleaners, is light and easy to handle, and is absolutely trouble-proof. It is dependable and efficient, and is doubly guaranteed by both the manufacturer and ourselves. Sweeping with a broom means transferring dust and dirt from one place to another. With this Vacuum Cleaner, rugs need not be taken up—nothing need be disturbed. Dust and germs are not scattered about the room to be inhaled, and the friction drum revolving brush rotates at sufficient speed to pick up lint, litter and clinging threads without injury to the finest rug or fabric. They are drawn into the wide nozzle and sucked into the dust bag from which they are easily removed and disposed of. This cleaner embraces the 2-fold principle of powerful suction which extracts all the hidden, deep-down, germ-laden dust and grit and the gentle sweeping revolving brush.

Ten Reasons Why the "House Maid" will prove the best value and the most efficient cleaner possible. 1. Handle grip is restful and fits the hand perfectly. 2. The famous Cutter-Hammer safety type push button conveniently located at the curve of the handle. 3. The unusually large capacity dust bag. It is equipped with a floor attachment which provides easy removal of the dirt. 4. The oiling system is positive and simple and operates by means of self-feeding oil wells. This makes frequent oiling unnecessary. 5. The well-known Invincible air-cooled Universal motor—a powerful motor—runs at high speed. Operates on either alternating or direct current, 105 to 125 volts, 60 cycles or less. 6. The substantial bronze bearings, the best metal bearings for high speed motors. 7. The nozzle is made of cast aluminum and is larger than the average, being 12 inches wide by 1 1/2 inches across the opening, creates a powerful suction without injury to finest fabrics. 8. The revolving soft bristle brush is spiral shape to pick up lint, ravelings, etc., and loosens the dirt from the inner parts of the floor covering. 9. Raising and lowering device. By operating the regulating button, the height of the nozzle from the carpet may be instantly regulated. This important feature is of great service in using the cleaner on rugs with high or low pile. 10. Locking clamp for regulating and locating the position of the handle is shown on the left side of the illustration by the slide and winged nut.

All Parts are made of the very best materials obtainable and the workmanship is of the very highest standard. The "House Maid" is equipped with 20 feet of cord and can, therefore, oftentimes be used in two rooms without detaching from the electric socket. The "House Maid" is trouble proof, light and easy to handle, and no mechanical or electrical knowledge is required. A child can use it easily. Shipped on trial from our Pittsburgh warehouse, safe delivery guaranteed. Shipping weight, about 12 pounds. Try it every day for a month and you will wonder how you ever got along without it. Don't judge the quality by the price. It is as good and dependable a cleaner as those selling at \$45 to \$65. Our tremendous purchasing power enables us to save you at least \$15.

The Dresser. The mirror measures 20 inches high by 24 inches wide; a very good quality of beveled French plate glass, well made, and fitted into a decidedly attractive mirror frame. The dresser contains four large drawers, which fit snugly, and slide easily. The heavy plank top measures 38x18½ inches.

Here Is A Real opportunity to secure a remarkable value in a complete bed outfit. Our low 30th Anniversary Sale Price is the result of an opportune purchase and our ability to dispose of large quantities of merchandise at exceedingly inviting prices. We specialize on quality furnishings, watch the market very closely and know good values when we see them. Further, we are satisfied with one small profit and are willing to pass the benefit of our large buying power on to our customers. If you were to purchase this outfit in your own town, even on a cash basis, you would have to pay considerably more. It has been many years since we have been able to offer a bed outfit of this character at the extremely low price of \$23.45. A rare value in every respect.

The Bed is made by the largest bed manufacturer in the country, and the design is extremely artistic. The pillars on the ends and the fillers relieve the plainness and add a decorative touch which is exceedingly effective. We are sure you will like it immensely. The posts are 1 1/16 inches in diameter and the fillers are 3/16 inch. The head board is 48 inches high and the foot board 34 inches high. It can be furnished in either baked-on ivory enamel or gold Vernis Martin finish. Guaranteed not to flake, chip or peel. Furnished in full size only, 4 ft. 6 in. wide. The bed is a combination of true artistry and durable construction—it is just as strong and dependable as it is good looking and we recommend it very highly.

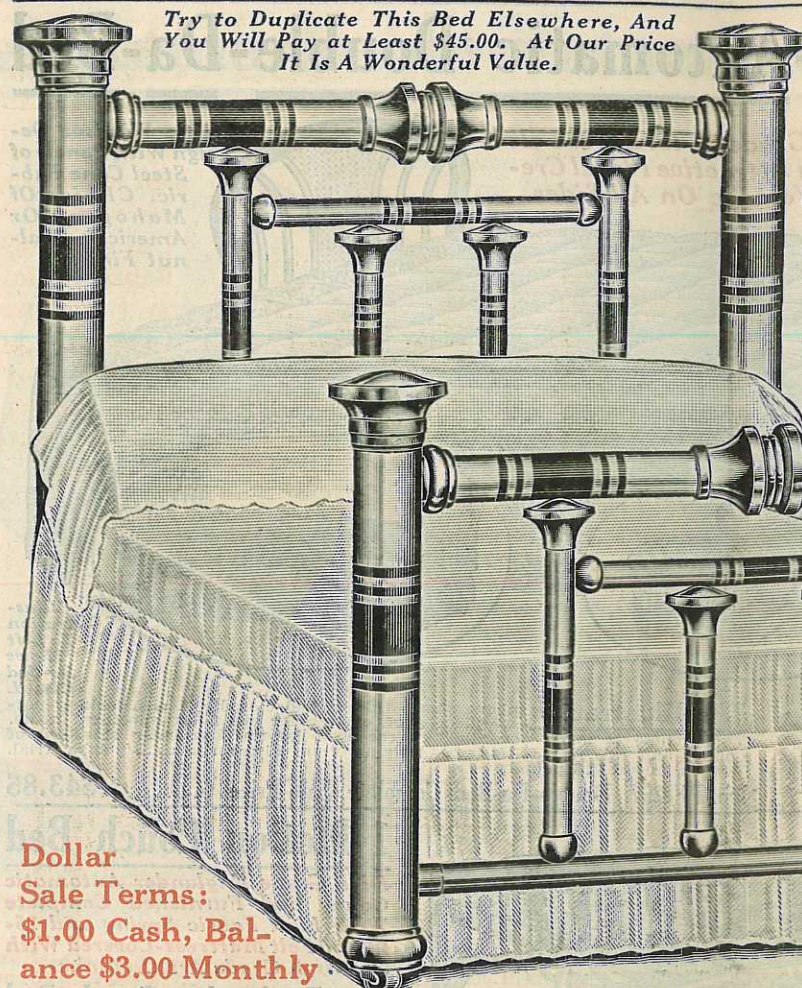

The Mattress in this outfit is a very high-grade article filled with thick layers of fluffy, sanitary felted cotton at the top, bottom and around the edges. The center filling is of basswood excelsior. This, with the thick felt layers on the outside, makes an exceedingly durable and comfortable mattress and one that will hold up and give you very satisfactory service. This mattress is far superior to mattresses that are ordinarily furnished with bed outfits. It is guaranteed not to sag and will hold its shape splendidly throughout the years you use it. The ticking is an excellent grade in a fancy art design and an artistic combination of colors. The mattress has a roll edge, is well tufted and weighs 50 lbs.

The Spring is unusually strong. It is made in one piece with side rails attached and has dovetailed corners. The lugs on the end of the spring fit into the cast sockets on the head and foot ends making it an exceptionally firm and rigid combination. The fabric is of double linked wire, thoroughly tempered for strength. It is unusually resilient and restful, noiseless and comfortable. There are 29 powerful helical coil springs at each end that fasten the fabric to the angle ends of the spring. The link fabric and springs have a galvanized finish and are rustproof. This outfit does not have separate rails. They are attached right to the spring which is a very convenient and satisfactory method of construction. The spring is absolutely dependable, and will not sag.

This Outfit in your bed room will tone it up wonderfully. It is not what you would consider an expensive outfit, still it is one that makes a splendid appearance and one that will prove absolutely satisfactory. In buying this outfit you are assuring yourself years and years of satisfactory service. During our 30th Anniversary Special Dollar Sale you can purchase this outfit on a first payment of only \$1.00. Mr. Nathaniel Spear started his first small store here in Pittsburgh 30 years ago. Today our stores in New York and Pittsburgh rank with the best and our mail order business has grown into a nation-wide institution. Values such as these have made this wonderful growth possible.

Compare This Outfit with what you can buy elsewhere. We are certain that you will be convinced it represents an exceptionally good investment. Send us your order and we will ship it promptly from our Pittsburgh warehouse. Use the outfit for 30 days and 30 nights. If you are not perfectly satisfied with it, we will permit its return and will refund your money and transportation charges both ways. Could any offer be fairer? Shipping weight 175 lbs.

No. PF504X, Porch Chair, 30th Anniversary Sale Price, \$4.65

Solid Oak. Porch furniture to wear satisfactorily must be made of oak. Other woods are cheaper, but oak is harder, closer grained, withstands weather better, takes a nicer finish, and in every respect is the most desirable. These pieces are made of solid oak throughout, and yet our prices are exceedingly low. Right here, let us explain that we bought this suite months ago at a big concession from the manufacturer and our selling prices are actually 25 per cent below the present market. The finish of these pieces is a very attractive fumed oak applied with skill and will withstand all weather conditions. Note the reinforcements under the arms, the heavy bolted construction—the stout, heavy stock—all this confirms your first impression that this suite will give the kind of service which you are right to expect. In every respect these pieces combine comfort, strength and durability.

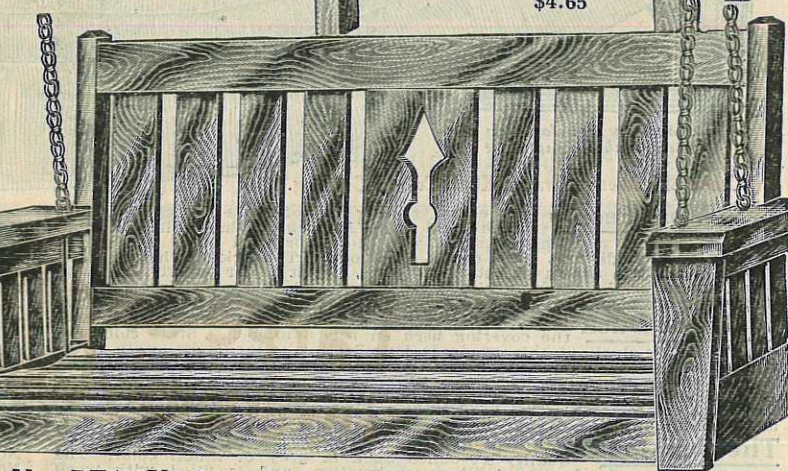

The Rocker is a very comfortable piece, with a back 22 inches high, heavy bolted construction, arms 3 inches wide and seat measuring 18x19 inches. The shaped seat affords extra comfort. The back slants at just the right angle, and this rocker measures 25 inches wide over all. Shipping weight 23 pounds.

The Arm Chair is another very desirable piece of furniture. Has roll shaped seat, high back, broad arms. Suited not only for porch and lawn use, but also makes a desirable piece for reception hall or other rooms. Shipping weight, about 18 pounds.

No. PF502X, Porch Settee, 30th Anniversary Sale Price, \$6.15

You can buy any of these pieces separately or the entire suite together. We believe it will pay you to buy all five pieces at our prices, because each piece has a use all its own. However, you may order two or more of any one piece—in fact, any combination you desire. All pieces are sold on our very easy credit terms, and are shipped on thirty days' trial from our Northern Ohio factory. Safe delivery guaranteed. If not satisfactory, write us for shipping instructions and we will refund your first payment and pay all transportation charges—you don't take one bit of risk, remember that. Our foresight in contracting for this porch furniture many months ago, at a big price concession from the manufacturer, enables us to sell these pieces at prices 25 per cent below the present market level.

We Recommend the 3A camera with double rapid rectilinear lens, our No. PF2485X, because better pictures generally are possible with this camera. The New Departure

coaster brake is the nationally advertised and well-known coaster brake that is found only on the very highest grade bicycles. It has proven its superiority to all other makes and has been adopted by the country's most famous bicycle makers. All parts are made from the very highest grade solid bar steel and are carefully ground and tempered in oil. The bearings are equipped with ball retainers throughout which reduce friction and enable it to take the steepest grades with practically no effort.

The Finish.

Spear's "DeLuxe Flyer" bicycle is beautifully enameled in a rich maroon with a white enameled head and black striping. The rims are enameled to match. Four coats of enamel are applied. They are carefully baked under an intense heat and are hand rubbed. This treatment makes them wearproof and waterproof. The finish will not chip, crack or peel. The large sprocket, hubs, spokes, pedals, hanger bars and crown of the fork are highly nickel plated, as are the handle bars and all exposed metal parts of the seat. In all it is a splendid looking bicycle and one that is built to give excellent service.

The Wheels are 28 inches in diameter and are made of one-piece maple. Front and rear wheels each contain 36 highly polished piano wire spokes.

The Hanger

is made in one piece of drop-forged steel thoroughly tempered to stand the hardest strain. The front sprocket has 26 teeth and the rear sprocket has 10 teeth, making 73 gear. This gear assures a great speed on level surfaces and makes hill climbing very easy. The bicycle has a 3/16-inch diamond roller chain with a 1-inch pitch, made from solid bar steel, carefully ground and oil tempered. This is the best chain obtainable.

The Frame is built on the regular 20-inch diamond frame lines, with a 2-inch drop of the handle bars at the seat post mast. This gives a total depth of 22 inches, and makes the bicycle suitable for men or boys of all ages. It is made of 1-inch, 19-gauge high carbon steel tubing with flushed joints. All joints are smoothly finished and reinforced by either flanged or fishmouth reinforcements. Has ample strength to carry the heaviest rider under the most severe riding conditions.

In order to meet the demand of ourselves and the largest department stores in New York and Chicago for a Special Silverware Bargain Offer at this time, Oneida Community has arranged to class the Primrose Design as a discontinued pattern, as in that way only does their sales policy permit them to approve such a radical reduction in price. As stated above Spear is the only mail order house permitted to offer the 26-piece Primrose set at \$9.95.

Every Piece New Every Piece Guaranteed. Remember that the Primrose Pattern has been discontinued only to make this sale possible. Primrose Design is made in the Par Plate grade, which is guaranteed by the manufacturer and ourselves for ten years daily constant home service. Both Oneida and ourselves guarantee it fully.

At the regular price of \$14.50, Primrose is excellent value, but a very much bigger value at our special 30th Anniversary price of \$9.95. The artistic festoons of primroses on each piece, the neat lines and graceful shapes will command your utmost admiration. This set is furnished in the handsome platinum gray finish.

The Set consists of twenty-six useful pieces for which you will find every-day need in your home: 6 large solid handle knives, 6 table forks, 6 full sized table spoons, 6 tea spoons, 1 sugar shell and 1 butter knife. High Grade 22-Calibre Rifle

Special Dollar Sale \$7⁹⁵
Terms: \$1.00 Cash; Balance \$1.00 Monthly

Simple, Fool-Proof, Best Quality. Every Rifle Thoroughly Inspected Before Being Exported.

Everyone Knows that there is no sport more exhilarating than target practice or small game hunting, which demands a keen eye, steady nerve, and a good reliable rifle. Here is your opportunity to buy one at a bargain price.

A Good Buy. We are always on the lookout for extra values to offer our customers. Recently the opportunity presented itself to secure a large quantity of these high-grade, imported single action 22-calibre rifles at a price far below the market level. Knowing as we do the selling prices of American-made rifles, we could not help but take advantage of this opportunity. Of course, there is a good reason for the ability of the foreign factories to manufacture these rifles at a cost much lower than they could be produced in this country. Material and labor are very, very much cheaper, and the rate of exchange is also in our favor.

Good Quality. Don't get the idea that this rifle is built down to a price. It is, on the contrary, a well-made, exceptionally good looking as well as a true-shooting rifle and has been sold in this country for many, many years before the war. Shipments have just recently been resumed.

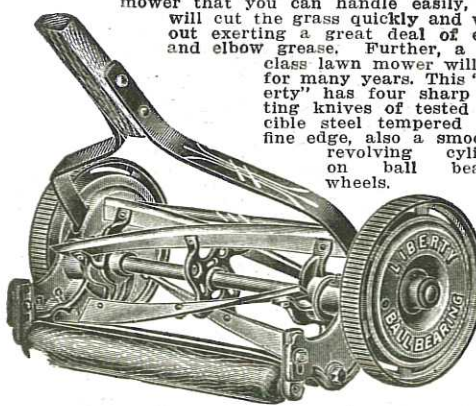

The Rifle Action is the celebrated bolt-type similar to army rifles. We call special attention to the simplicity of construction of the rifle, its small number of parts, the coil, main and trigger springs, which are very much less liable to break than the V-shape springs. Rifle is taken down by unscrewing thumb screw underneath the fore-end, thus releasing barrel and action from the stock. Extractor is fastened in breech-bolt instead of being a floating extractor.

The Barrel is of fine steel, highly polished and blued, round and 24 inches long. Stock is made of fine walnut, highly polished, with checkered pistol grip, 18 1/2 in. long. It is fitted with open front and rear sights, carefully adjusted. Rifling is done by the most approved machinery and shooting guaranteed. Each rifle is shot and tested before leaving the factory. Rifle weighs about 3 1/2 pounds and is 36 inches long over all. It shoots 22-calibre rim-fire cartridges, short, long, or long rifle. Bullet breech caps may also be used. Illustration Below Shows the Simple Fool-Proof Interior Construction of the Improved Supply Pipe and Burner. Smokeless, Intense Heat Guaranteed.

This Plymouth Wickless

oil range with built-in oven as an ideal range for constant use—both summer and winter. It is not only economical to use but it is also absolutely dependable. It burns kerosene (ordinary coal oil), requires very little attention, and is ready for use always. It uses but little fuel, burning many gallons of air to each gallon of oil, produces the most perfect combustion possible, and thus assures the greatest economy in the consumption of oil. Its cooking capacity is sufficient for very large families and it is economical for the family of but two or three.

The Design of this Plymouth Wickless oil range is a straight line effect, quite different from the ordinary oil stove. In fact, it has the appearance of the popular cabinet gas ranges.

It is extra large in every respect; has an extra big oven, a very wide and deep cooking top and extra large burners.

The Built-In Oven of this stove is stationary—a fixed, permanent part of the range. It has a patented self-sealing tongue and groove door construction which prevents the wasting or escape of heat. Cold air cannot circulate around or in back of it to retard baking. It also adds to the stove's appearance and general strength. It bakes perfectly and you will be delighted with the juicy roasts, thoroughly baked loaves of bread and its exceedingly satisfactory qualities. The inside of the oven is corrugated and nicely finished. Heats quickly and uniformly. Has adjustable wire rack and a flame spreader which assures even heating. The oven door is also equipped with a thermometer, which registers the heat of the oven and enables you to gauge your baking scientifically, without opening the oven door.

The Construction is all that experienced and scientific methods can accomplish. Only the very finest materials enter into the manufacture of this stove, and we guarantee it to give absolutely satisfactory service every day, year after year. The full cabinet body is closed on three sides. This keeps drafts away from the burners. The stove is sturdy and rigid throughout. The glass oil tank is held securely in place by a clamping device; it cannot be thrown off accidentally.

The Finish. The entire body of this stove is finished in baked-on black enamel, rust proof and easy to clean with a damp cloth. The chimneys are blue porcelain enamel and add greatly to the appearance. The oven door panel is blue vitreous porcelain enamel. This porcelain enamel is applied under the strictest supervision, and is far superior to the ordinary enamel used on most oil ranges. It is guaranteed not to crack or chip from the heat, and positively will not discolor or spot. This is not an ordinary range; it will last a lifetime.

The Burners. This stove is equipped with valveless burners operated by a lever handle which regulates the flame by lifting or lowering the burner, a quicker and more accurate control than valve type burners. The burner bowls are mounted on brackets which support them both front and back, so they cannot get out of level.

The burners are clamped to the lead pipe by set screws and can be readily removed if necessary. The centering device on the burner bowls makes the burner set properly and assures a clean, blue flame at all times. A steady, smokeless, odorless, intense heat guaranteed. The burners measure 4 inches in diameter, while most other makes have 3 1/4-inch burners. This means a difference of 15 to 30 per cent in heating power.

Special Features. Note the drop oven door, on which you can rest dishes, cooking utensils, etc. Of course this would be impossible on a stove with a removable oven. All four burners can be used for cooking by leaving the oven door open; or you can bake in the oven and cook on the other two burners at the same time. The blue enamel chimneys on this range prevent radiation and concentrate the heat on the cooking vessels.

Beautify Your Kitchen. This range will fit into any part of your kitchen. It requires no piping or chimney. The heavy glass oil tank is an added feature, showing you the amount of oil you have; it holds a large supply, easily removed for cleaning and refilling. Set up in a moment. The wealth of nickel trimmings set this stove off to wonderful advantage. The smooth, black body made of heavy gauge sheet steel. Takes the place of a coal and gas range and will do your cooking and baking efficiently and economically.

No Wicks to Trim. Asbestos rings replace the old style disagreeable wicks. These rings need no trimming and produce a strong, steady blue flame with the maximum amount of heat. They are a big improvement over wicks and additional rings can always be procured at the small cost of 35 cents per set of four.

Simple to Operate. This range is very easy to use. There is nothing complicated whatever in its construction. When the burner handle is raised, oil feeds through the supply pipe to the asbestos lighting ring which can then be lighted in the same manner as a wick. As the burner becomes heated, which requires two or three minutes, it changes the oil into gas and burns a clean, blue flame with an intense heat without smoke or odor. The burners make the gas as fast as it is burned. A complete set of directions for operating accompanies each stove. Measures 54 inches long, 48 inches high, and the cooking top over all is 45x14 inches. The oven occupies 19 inches of space, so the balance of cooking top is 26x14 inches. The oven measures 18x12x12 inches.

Reduce Your Work. This stove reduces your work one-half. No fires to make, no coal to carry, no ashes to handle, no smoke or odors. Does away with killing work. Saves your money, your health and your vitality every time you use it and thus rapidly pays for itself. Can be used every day, summer and winter. Use it for 30 days and if not satisfactory we will refund your first payment and all transportation charges. Shipped, well crated, from Pittsburgh, safe delivery guaranteed; weight, 130 pounds.
