## PUT A STOP TO IT

---

There are persistent rumors about that Jewish peddlers are being beaten up in the Polish districts of this city as a result of the recent Jewish protest against the massacres in Poland. If this be true, then the Poles are far more short-sighted than we ever gave them credit for. Of course we are not accusing representative Poles of any such outrageous conduct, but some effort should be made to curb the lawless and irresponsible element. We think that the Police officials should consider this situation and investigate the truth or falsity of such accusations through the so-called Polish districts on the South Side, Lawrenceville and elsewhere where there are large Polish settlements. If there is some Jew connected with the city administration who is not too busy playing politics to take an interest in his own people, maybe a disagreeable situation may be improved. We are further advised that boycotts have been urged by the Poles in certain districts against Jewish merchants. And pray, gentlemen, what have these Jews been guilty of? Of protesting against the **COLD BLOODED MASSACRES** of their **BRETHREN** in **POLAND**. For this, the Poles in Pittsburgh are trying to **PUNISH THE JEWS**—and yet the Polish people demand the right to govern themselves.
